New Design Multifocal Contact Lenses / Drivesafe Lenses Winter Offer

**Glare from headlights and wet roads can be distracting and uncomfortable when driving at night. Have you tried Zeiss Drivesafe lenses? They are designed to give you clearer wider vision when your pupils are larger.**

More people can succeed with multifocal contact lenses than ever before with new designs which allow for your pupil size, making vision clearer near and far

Are there times when your glasses are a nuisance? Do they steam up when it's cold and wet?

Do you find it difficult to play golf and other sports in your varifocal specs?

Contact lenses can be a great alternative to glasses and it's easy to get started

One day contacts are perfect for part time wear and cost as little as £1.50 per day

When you come for your eye test, we will explain the DVLA standards to you, and check your vision with and without distance spectacles. There are also some eye conditions which should be declared to DVLA so that your insurance is valid. We can advise you on these matters when you have your routine eye test. For certain occupations, there are different standards and you may need to have a report signed to state that your vision meets the requirements.

This is something we can help with.

At Sherratt Opticians, we realise how important it is for people to continue driving safely throughout life. We can provide positive solutions to vision problems like glare from headlights and low sun, and are specialists in advising on Individual lens designs.
