

Further to our update from the 17th March

Today, following advice from the General Optical Council and other associated professional bodies in the Optical Industry, we have taken the decision to temporarily suspend all routine eye examinations and contact lens checks, in order to protect the health and well-being of both our patients and our staff during these difficult times.

If you have an eye sight problem and need urgent care or advice, or if you are having problems with your glasses or contact lenses that cannot wait then please contact the practice on 01270 505504.

If you require solution please contact the practice for availability, but please only request what you need as we have limited stocks available.

Anyone requiring a routine contact lens check should contact the practice, and we will arrange for an over the phone review, and further advice given if there is vision concern or you are experiencing any discomfort.

We will continually monitor the situation, working with government guidance and NHS England, and we look forward to welcoming you back to the practice when we are fully functioning again. Your support is greatly appreciated.

Please keep safe

The Sherratt Opticians Team
